SKILLS

Programming & data:
Java (e.g. [this](#) simple android application and lots of small applications like [this](#))
Data analysis (in Jasp and SPSS, Frequentist and Bayesian)
Spring Framework (basics)

Creation:
Adobe Première, Adobe photoshop
Knowledge and application in **creativity, rhetoric** and **flourishing**

CAS BECKER

Mendix & React-Native developer

WORK EXPERIENCE

Interleaf - zzp

April 2023 – present

Freelancer in Mendix, Mendix-Native and React-Native. I'm involved in multiple projects.

Prescan: As a Mendix & Mendix—Native developer I support the development team of their MijjnPrescan environment.

Linden-MX: I'm a Mendix trainer at Linden-MX where I teach a group of Mendix trainees every month to achieve their intermediate (and sometimes advanced) certification.

International Card Services

April 2022 – Nov 2022

React-Native and Mendix Native developer at project Aurora. Guiding the development of a Mendix Native creditcard application and creating custom widgets with React-Native to extend the capabilities of Mendix. Working with Javascript and CSS to create the best solutions. Examples of this are a card carousel, animated balance bars and two different custom bottom sheet implementations.

De Nationale Denktank – Participant

August 2022 – December 2022

Each year, the Dutch National ThinkTank brings together twenty young academics to get to grips with a societal problem through innovative ideas. This year, we're dealing with the rampant biodiversity loss in the Netherlands. We start with a period of thorough research and analysis into its root causes, followed by a period of brainstorming and prototyping creative solutions.

Finaps – (Technical) Business Engineer

July 2020 – Aug 2021

Working together with a team of diverse engineers and clients to build the best possible application solutions. Using Mendix, Java, Javascript, CSS, SAS and React-native, I've done projects for multiple partners.

Rabobank: Working with Mendix, React-native, Javascript, CSS, SASS and Java to design a diverse array of solutions for the complex and security-heavy mobile app in Belgium and Germany. Examples of this are new bottom sheet widgets, redesigning the font back-end and guiding the transfer from Mendix 7 to Mendix 8 in the web-application.
DHL: Working with Mendix to complete a deep linking module for their shipping partners.

MyFinaps: Working with Mendix and Java to design new solutions. Here I also achieved my [Mendix Advanced Developer Certification](#)

FURTHER EDUCATION

Corderius College – HAVO

Design patterns, through reading and working through the book [Head First Design Patterns](#)

Java tutorial course through Sololearn ([certificate](#))

Theoretical knowledge in **deep learning** and **neural networks** (BSc Psychology)
